Earned 24 credits at CCNY

Thursday, May 17, 2018 at 4:00 p.m.

CCAPP End of the year celebration and Division of Science Awards Ceremony

Deadline to apply: Eligible students must be majors or interested to major in Mathematics, Physics, Environmental Earth System Science (EESS), Biology, Biotechnology, Biochemistry, Geology (EAS), one of the departments in the Division of Science: Mathematics, Physics.

To be eligible you must have:
- Earned 24 credits at CCNY
- A cumulative GPA 3.00 or higher (Check & Levine 3.5)
- And a Science/Math GPA 3.0 or higher (Check & Levine 3.5)

For more information or to apply please visit: https://www.ccny.cuny.edu/science/division-science-scholarship-application-2018

For questions email: nsantiagoarcher@ccny.cuny.edu

After a grueling six months, our idea of a centralized Division of Science Student FAQ poster has finally become a reality! The idea emerged from the 2017-18 Annual Staff Retreat as a means of simplifying processes for faculty, answering questions ranging from ‘how do I register for a course’ to ‘how can I find a research position on campus’. We tried to identify and answer every student question imaginable. The resultant posters are displayed within each department in the Division. Thank you to all Department and Dean’s Office administrators for their contributions to this monumental effort.

DUNK!
By: J. Batista
What do Science, Tech, Engineering, Art, & Mathematics (STEAM) have to do with this weekend’s NCAA Final Four? A lot, actually. In a former brewery space on 461 West 126th street, CUNY faculty members - through the non-profit Science & Arts Engagement New York (SAENY), have opened an inaugural pop-up exhibit called DUNK! DUNK’s founders plan to spur young people’s interest in STEAM fields by providing interactive student-led exhibits that display how science and art affect everyday life. CCNY Physics students are leading exhibit tours, explaining the science behind basketball, and the collaborative effort that brought the project into fruition.

The exhibit aims to teach that basketball is science in motion. The newly-renovated space is part of a greater redesign of the new Tastee building, modeled after the Science Gallery in Dublin, Ireland. Visitors can compare their wingspans with those of 7’6” NY Knicks Kristaps Porzingis & 6’9” Phoenix Mercury Brittany Griner. Visitors can compare how high they can jump relative to famous players and learn firsthand how the combination of velocity, gravity, and strength can ensure perfect passes and hook shots.

DUNK is now open through April 14th. Admission is free. Whether you’re invested in this weekend’s tournament or your closest basket is under your work desk, the DUNK exhibit is sure to be worth your while. For more details please visit www.SAE-NY.org

Everyone used to be adorable, many years later these kids are grown ups who are making your lives miserable on a daily basis at work. Guess who? Who are? First three to guess three correct answers will win a Division of Science T-Shirt.

Happy Easter and Good Yuntif
